

REVITALIZATION AND REACUALIZATION OF KARAWITAN AND TRADITIONAL DANCE ARTS IN TAMANTIRTO VILLAGE TO STRENGTHEN CULTURAL VILLAGE STARTS

by Kuswarsantyo, Muhkamad Wakid, Bambang Suharjana

ABSTRACT

Tamantirto Village has strong tourism prospects. Apart from the Sendang Kasihan bathing site, this area has the potential for artists from various branches of art, but their exploration is not optimal. Some of these potentials can be developed as a tourism village and as a pilot cultural village. Revitalization and re-actualization are needed so that the existence of Tamantirto's unique culture is sustainable and more explored. The main purpose of this service activity is to increase the empowerment of management partners for the Tamantirto cultural village pilot and increase cultural activities by increasing the skills of community groups, especially in karawitan and dance arts, preserving traditional arts and developing arts. The main activity of the service is to compose dance compositions and songs typical of Tamantirto and practice them for Tamantirto children and youth 10 times and end them with a performance. The appreciation from residents and the government of the Tamantirto urban village is very good and hopes that service programs like this will continue.
