

MANAGEMENT OF FACILITIES SPECIAL CLASS SPORTS IN SENIOR HIGH SCHOOL 4 YOGYAKARTA

by Tri Ani Hastuti, A. Erlina Listyarini

ABSTRACT

This study aims to determine the management of facilities Special Class Sports in Senior High School 4 Yogyakarta. This research is a qualitative descriptive study. The research location is in Senior High School 4 Yogyakarta. The research subject is the Principal and teachers of sports / chairman of a special class of sports. Research data collection was this use interview, observation and documentation. Analysis of the data conducted the analysis of qualitative data. The results showed that the management of infrastructure in a special class sport is still not optimal, this is because the infrastructure used is limited by the absence of: some field that is integrated with the school, indoor building for training, so the training is often disrupted by the weather. In general means for all sports enough, but the treatment and removal is not optimal.

Kata Kunci: *management, facilities, special class sport*
