ABSTRACT

Community Services aims: 1) to disseminate the existence of the role of youth organizations role in development, 2) provide awareness of citizens to participate in the activities / become a member and an active management, 3) provide vocational training administrators / members make strategic planning and fisebel, 4) provide skills to make a proposal within the organization.

This training has to be performed well. Training is addressed by the participants and was attended by 30 participants, or 100%, the youth in the village of Lean Chess. Participants can receive good training materials and training activities are also getting a very positive response. It can be seen from the responses of participants during training. The results of the training in the form of 4 pieces of proposals ready for submission to the village government, and expected to be completely processed and approved the plan of activities designed so that can actually be realized.

The factors that support these training activities include: a) openness of the participants. Activities carried out several times, but it does not reduce the morale of participants for the event to end, b) a high enthusiasm of participants, indicated the presence of participants reached 100%. The enthusiasm of the participants is also evident from the attention given at the time of delivery of the material, during the discussion to formulate ideas and draft proposals, and in the preparation of proposals. community development activities in the youth organization has produced four proposals ready for submission and realized. The inhibiting factor is a member of clogs [pok there are still passive.
