

Scientific Writing Training Course to Improve Teaching Competencies of Elementary School Teachers in Wirosari Sub-district, Grobogan Regency, Central Java

by Sugeng Bayu Wahyono, Mulyo Prabowo, Estu Miyarso

ABSTRACT

ABSTRACT: Community service activities are aimed at 1) improving the competence of teaching elementary school teachers in the District of Wirosari Grobogan District through the activities of PPM Lecturer FIP UNY. 2) Increase the willingness and ability to write scientific work of elementary school teachers in the region Wirosari Grobogan District.

PPM activities are conducted in the form of training. The methods applied in this activity are: lectures, frequently asked questions, practice of formulating the problem, and tutorial on line. The materials presented in this activity include: basic concepts of writing scientific papers, benefits and significance of scientific work for elementary school teachers, techniques of idea generation or scientific ideas, scientific writing procedures.

In general, PPM activities have been done smoothly. This PPM activity is carried out together with other similar FIP PPM groups in the same place. This PPM activity received positive responses from teachers. This is marked by the number of participants more than 25 people which means that has met the target and enthusiastically follow the course of PPM activity is very high from the beginning to the end there is no permit out. As for the results of the assessment both the increase in the ability of participants and assessment of the process of activity has met the criteria and indicators that have been set.
