

# **Training of Treatment And Handling Of Pest And Orchid Plant Disease For Members Of Indonesian Orchid Association Branch Of Yogyakarta Special Region**

**by Lili Sugiyarto, Ixora Sartika Mercuriani, Evy Yulianti**

## **ABSTRACT**

This devotion activity aims to improve the knowledge and skills of PAI members (Perhimpunan Anggrek Indonesia) in terms of handling pests and diseases of orchid plants. This is due to the frequent occurrence of constraints in orchid cultivation that has not been understood by orchid lovers, especially those joined to PAI members, so the need for the provision of materials and skills about pests and diseases of orchids. This event was attended by 58 participants, which included 2 sessions, namely the giving of pests and plant diseases on orchids and demonstrations in the form of participants bringing orchid plants and orchid photos that are problematic due to pest and disease attacks. From the questionnaire results, the question of the devotee team to the participants shows that 72% of participants who have not understood pests and diseases in orchid plants. And 27% of participants understand enough about pests on orchids. There was a 100% increase of participants' understanding and skill about pest and disease of orchid plants.
