ABSTRACT

Collaboration is a very important aspect for the development of an institution, including the Faculty of Education and Psychology (FIPP) Yogyakarta State University. However, the various collaborations that have been established between FIPP UNY and partner institutions have not yet run optimally because these collaborations have not been realized in the form of joint activities involving the partners. The issue of the realization of cooperation not being optimal is an important issue considering that cooperation is one of the important points emphasized in the Yogyakarta State University Strategic Plan 2020-2025. The main objective of this research is to accelerate the actualization of multi-action collaboration between FIPP UNY and partner institutions. In connection with the Yogyakarta State University Research Strategic Plan, this research is an effort to realize the Strategic Target "Improving the Quality of Civil Service, Governance, Services and Cooperation" in the form of policy direction to improve academic reputation. The actualization of this multi-action collaboration will be carried out by synergizing several flagship Merdeka Belajar Kampus Merdeka programs, including certified internship activities, independent student exchanges, teaching campuses, and certified independent project studies. This research is qualitative research to explore and collect data regarding FIPP UNY's partnerships with other universities on a national scale. The research will be carried out for one year (1 stage). The research population is FIPP UNY Partner Universities. This research targets output in the form of submitted articles in the accredited national journal Sinta and monographs.

Kata Kunci: *cooperation, strategy, actualization*
