

# Instructional Media of Programmable Logic Controller Using Video Scribe for Training Industrial Electronics Teachers

by Mashoedah

## ABSTRACT

**Abstract.** One of the weaknesses in the teacher training program is the minimum use of instructional media and unsuitability of teaching method while in fact those two are really needed. the research is aimed at developing the instructional media using Video Scribe application for teacher trainings. It employed the Design and Development Research (DDR). The data were collected through questionnaires using the rating scale and analysed quantitatively descriptively. The results obtained indicate that the learning media using video scribe for teacher training is very feasible to use.

**Keywords:** Instructional Media, Video Scribe, Teacher Training
