

PELATIHAN SAFETY RIDING SEBAGAI UPAYA MENINGKATKAN KESADARAN, KETERTIBAN DAN KESELAMATAN BERLALU LINTAS

by Ir. Bambang Sulisty, S.Pd., M.Eng

ABSTRACT

This community service activity program aims to find out how to implement safety riding training and seminars for vocational school and college students so they have driving skills. The form of implementation and training in safety riding consists of 3 (three) stages, namely; pre test, safety riding theory and practice material to establish safe riding skills, ending with a post test. In the implementation of safety riding training and seminars, it is carried out using a lecture method explaining the basic theories and general knowledge of safety riding training, this demonstration method is given to explain the use of procedures in safety riding, this supervision method is used to determine the extent to which each training participant is able to carry out safety riding procedures. provided by the instructor, independent training methods and evaluation to determine the extent to which each participant is able to carry out safety riding procedures. The target of this safety riding training and seminar activity consisted of 130 vocational school students and 175 university students

This safety riding training and seminar has provided valuable insight to the younger generation (vocational school students and college students) about the importance of safe riding. Hopefully activities like this can continue to be carried out to create a safer and more responsible driving environment.
