## **ABSTRACT**

The training aims to introduce the method of preparation of a learning tool for teachers of subjects Indonesian junior and guiding teachers to be able to do a good learning practices using learning tools that have been developed for Indonesian subjects. The training participants are teachers of SMP that administer Indonesian subjects. They will receive training on the preparation of learning tools for three days. From the results of this activity can be drawn two conclusions. First, teachers are highly motivated to devise lesson plans well. Second, the training has produced a learning device in accordance with the standards process.

Kata Kunci: *Learning, method*
