ABSTRACT

Abstract

The study aimed to evaluate the training program of professional teacher candidates personal competence through professional education teacher at Boarding of Campus Wates YSU 2016. Planting will be competence evaluation through dengan concept CIPP (context, input, process and product).

The study used qualitative approach to describe implementation programs campus dormitory manager Wates in the implementation of professional education boarding primary school teachers. The data collection method was observation, interview and documentation with the data source is the manager of the hostel, the hostel staff, students / participants PPG and lecturers.

The results showed that the components of the "context" PPG educational boarding form of existence Teacher training producer prospective elementary teachers still needed given the number of teachers is still lacking, the legal basis for teacher education is strong and clear and geographical conditions that campus locations accessible to the public and or students. Component "input" PPG boarding education on aspects of the vision, mission, goals and programs disosialisaikan less efficiently, but at resources aspects are good. Components "process" PPG educational boarding on aspects of leadership has been good managers of the model, providing guidance / advice and rules have been applied consistently through the cooperation of the hostel managers and technical employees in the field. However, the participation of managers of hostels is less when participation has been good. Learning independence and fulfillment of personal needs of participants has been good. The learning process is done well, it's done lerning lesson or fellow participants learn from each other and there is a good habituation in learning. Components "product" PPG berasarama education on aspects of academic performance has been good and a learning environment that supports the achievement of personal competence of participants PPG.
