

pelatihan pendidik anak usia dini bagi pendidik PAUD berkaitan dengan pengembangan aspek motorik

by lismadiana

ABSTRACT

The purpose of this training is to increase the insight and skills of PAUD educators regarding the basics of developing motoric aspects of early childhood.

The PPM Program Training for early childhood trainers for PAUD educators was held on 28-29 September 2013 which was attended by 34 participants from PAUD teachers in Godean District. The implementation starts at 08.30-17.00 WIB. The activity was held in the village of Sidoagung, District of Godean, Sleman Regency. The method used in this service is the lecture and demonstration method to explain the material to be given, namely: 1) Basic concepts; 2) Growth and Development of Children 0-6 and 3) Early Childhood Problems; 4) Early Childhood Growth and Development Stimulation Techniques.

The PPM program with training in developing motor aspects is felt to be very important for PAUD educators in order to increase their knowledge and skills in providing stimulation of growth and development in accordance with the stages and tasks
