## **ABSTRACT**

This Community Service Program aims to improve human resources, especially regarding art-based scientific writing for PAUD and elementary school teachers, the methods and models of this Community Service Program use a workshop model and structured practical training with the target of this activity being Kindergarten teachers. There are 30 - 50 children and elementary schools in the village of Giripurwo, Gunungkidul Regency, Special Region of Yogyakarta. The Community Service Program activities are carried out in the form of training using the lecture method, question and answer, demonstration and hands-on practice. The result of this activity is the realization of appreciation and scientific works and journal drafts from 10 elementary teacher training participants and 15 journal drafts for early childhood.
