

The Effectiveness of Drum Lesson Video Learning Media on Students' Drum Playing Achievement in DIY

by Prof. Dr. Kun Setyaning Astuti, M.Pd., Drs. Pujiwiyana, M.Pd., Fransisca Xaveria Diah Kristianingsih, M.A., Dr. Cipto Budi Handoyo, M.Pd.

ABSTRACT

The purpose of this study was to determine the effectiveness of video lesson learning media in the music ensemble learning process. Drum Lesson Videos are learning videos whose purpose is to teach how to play the drums through tutorials. The advantages of this video are that examples of exercises are based on the learner's side so that students can imitate students in the same position. The research approach is quantitative with an experimental pretest-posttest design. The analysis technique used is the t-test. The results of the study show that the drum lesson video learning media is effectively used for drum learning. The results of the t-test analysis between the post-test and pretest are different in significance. 0.00. This shows that there is an increase in students' ability to play the drums after using this media.
