

Workshop on Making Souvenir of Bioplastics for Empowerment of Youth Social Institutions occupants in Magelang.

by Ekosari Roektingroem & Susilowati.

ABSTRACT

Community service activities (PPM) aims to empower people, especially teenagers occupants of social orphanage, through: improvement of knowledge and skills in making souvenir with basic materials bioplastics.

Community service activities (PPM) was held on Thursday, July 28, 2016, held at the Social Institution, Hall Kumuda Putra Putri, Jl Sentot Alibasyah No. 940, City of Magelang. The workshop participants there were 41 teenagers, mostly in vocational schools and some junior high. The workshop, consisting of: 1. interactive lectures; to convey the theoretical foundations that are important to be ruled by the participants; which is at present in the midst of the delivery, if there are less understood immediately explained. 2. Demonstration; to show the working process so as to provide convenience for the participants; so that the participants are expected to observe thoroughly the techniques given. 3. Practice makes souvenir with gel or fiber material of resin / bioplastics.

Evaluation of the activities carried out by the current monitoring activities take place, such as observations on the response and activity, since the plenary session to implementation practices make souvenirs; as well as the participation of the participants began the first session until the end of the session. Based on the indicators of success in community service activities (PPM), namely: the response, active and enthusiastic involvement / participation of the participants, then the implementation of this program worked so well.
