

# **WORKSHOP MAPPING OF BASIC COMPETENCY COMPETENCY OF INDONESIAN LANGUAGES FOR TEACHERS SMP IN YOGYAKARTA CITY**

**by Sudiati**

## **ABSTRACT**

This activity aims to provide opportunities for teachers to understand adequately the changes in the learning paradigm according to the demands of the Curriculum 2013 as well as provide opportunities for teachers to understand the Graduate Competency Standards, Content Standards, and KI and KD, KD mapping into learning indicators, as well as concepts and or learning principles that apply discovery / inquiry learning and learning-based learning-based learning methods. The activity method used is training and workshop by using andragogy approach. This method is chosen so that the participants can experience every step of the activity process according to the problems and needs they face in school. This activity can be carried out according to the planned schedule. This activity was attended by 30 Indonesian teachers. As a result, the participants can follow the activity from start to finish seriously, both in the perception of perception through lectures and question and answer as well as in the practice of KD mapping, understand the steps of pemetaan KD, do the mapping of KD as a reference for the preparation of RPP. Most of the participants were satisfied with the organization and felt the valuable knowledge and skills they needed in KD mapping.
