

RESEARCH MAPPING OF MASTER PROGRAMME STUDENTS OF SPORTS COACHING EDUCATION STUDY PROGRAMME FIKK UNY

by Endang Rini Sukamti, Ratna Budiarti, Wisnu Nugroho

ABSTRACT

The Master of Sports Coaching Education programme is a study programme designed to produce graduates who are competent in designing, developing, and managing effective and efficient sports training programmes. To achieve this goal, students of the Master of Sports Coaching Education Study Programme at FIKK UNY are expected to conduct research that is beneficial for the development of sports science and sports training practices. In an effort to maintain the quality of education and learning, it is necessary to conduct research on the mapping of Student Research in the Master's Program in Sports Coaching Education Study Program at FIKK UNY. This research method uses a quantitative descriptive research design using a survey approach that will examine a case study (casus study research) about the research mapping of the final thesis of students of the Master's Programme in Sports Coaching Education FIKK UNY. The subjects of this study were 26 thesis documents of alumni of PKO Master Programme Students of FIKK UNY. The instrument used in this research is a rubric. The data obtained were then analysed using percentages.
