ABSTRACT

The socialization aims to provide the knowledge for parents about parenting in general as well as equipped with an emphasis on areas such as education, health, social and religious. It also sought to provide knowledge to the parents regarding children's rights in accordance with the CRC (CRC).

Outreach activities using lectures, brainstorming, brainstorming and dialogue. Selection of this method is done with the aim of achieving the desired target, namely the successful socialization of child care in the family. In this activity, the target audience is mothers and communities around the village Tegalmindi, Sardonoarjo, choosed, Sleman.

Each participant socialization apply a different upbringing. There were adopting a permissive, authoritarian and democratic. Most of them apply authoritarian patterns in various fields. After the socialization of the participants ended up trying to change their parenting has been applied so far to comply with the upbringing of children as well as children's progress in the future. Moreover, efforts to change the parenting appeared after they learned of the rights of children according to the CRC that should long as they fulfill.
