ABSTRACT

Community Service Activities (PkM) aim to provide teachers with an understanding of the concepts of School Wellbeing (SWB) and Student Citizenship Behavior (SCB) as well as providing skills for integrating SCB formation into learning activities and school programs in general by also paying attention to the dimensions of SWB. The implementation of PkM took place at SMK Muhammadiyah 2 Sleman, in the form of workshops and mentoring.

The workshop activity was attended by 30 teachers at SMK Muhammadiyah 2 Sleman. The workshop ran smoothly for 120 minutes (2 hours), the participants were enthusiastic and participated actively. The use of activity and reflection sheets proved to be quite effective in making participants participate in the workshop actively. The N Gain Score % result obtained was 69.167%, so this workshop proved to be quite effective. In terms of participants, there were 14 participants whose N Gain Score was > 0.7 or in the high category. Meanwhile, the N Gain Score which reached 0.3-0.7 was 13 participants or in the medium category. There were 3 participants with low category scores (N Gain score < 0.3). In terms of satisfaction, 30.7% of participants were very satisfied and 69.3% of participants were satisfied. This activity needs to be followed up by integrating the SWB and SCB concepts in the Learning Implementation Plan and other school programs. For this reason, this need can be solved by continuing PkM activities in the following years.
