ABSTRACT

The purpose of this study was to determine the effectiveness of the online learning system in delivering practical competencies and 4Cs during the new normal at Vocational High School Automation and Office Governance Skills Competence

The method used in this research is a survey with a approach quantitative. The data collection technique uses a questionnaire that is packaged in the format of google forms. This was done because when the research was taking place, the world was being hit the COVID-19 pandemic so that data collection is done online. Data analysis done in a quantitative descriptive manner by presenting it in tabular form central trend and pour it into a diagrammatic chart.

Based on the data obtained from the results of research and the results of data analysis the researcher has done, then conclusions can be drawn to answer the problem formulation defined in this study. The conclusions in this study are 1) The learning process at the Automation and Governance Skills Competency Vocational High School Offices (OTKP) in DIY during the COVID-19 pandemic were carried out with the system online and offline. For practical subjects, the school organizes learning offline on a limited basis and 2) Overall the learning process at SMKN in DIY during the covid-19 pandemic it went well. Both teachers and students think that learning can take place even though there are a number of obstacles faced. In addition to the opinions of teachers and students, one of the indicators of the ongoing process good learning is the achievement of the average value of subjects by students in above the specified KKM limit.
