

TRAINING OF STUDY OUTCOMES EVALUATION FOR JUNIOR HIGH SCHOOL TEACHERS IN KLATEN REGENCY, CENTRAL JAVA PROVINCE

by Yudanto, Willy Ihsan Rizkyanto, SONI NOPEMBRI, Jaka Sunardi, Hedi Ardiyanto

ABSTRACT

The Institutional Community Service Program aims to provide Training for Evaluation in PJOK Learning Outcomes for MGMP PJOK teachers. Partners in this service are all participants of the Junior High School Teacher Evaluation Training Program in Klaten Regency, Central Java Province. Partners will produce outputs in the form of assessment instrument materials to measure student learning outcomes qualitative data from the affective, cognitive, and psychomotor domains and assessment instruments to assess quantitatively from the affective, cognitive and psychomotor domains as a complement to the process of evaluating participants' PJOK learning outcomes educate. Another outcome in this service is in the form of an MoA which will be implemented in the form of IA as the first party, namely the Masters Program in Physical Education, and as the second party, the PJOK Teacher MGMP. The instrument for evaluating the success of service activities used in the form of a questionnaire using the Guttman scale, there are only two variables, namely "agree" / yes or "disagree". The data analysis used to measure the evaluation of this service activity is categorized as 5 categories, namely: very good, good, moderate, poor and very poor. The questionnaire instrument grid is obtained from the factors and indicators that will be measured in this service in the form of clarity, practicality, and novelty. Physical education learning needs to be carried out even though it is constrained by offline learning situations. Physical education learning must continue to run by utilizing the help of electronic media and advances in science and technology and supported by the role of teachers in developing evaluation techniques in learning amidst the dynamics of the curriculum at the education unit level. The science of evaluating evaluation should be developed to enrich the repertoire of physical education teachers to measure students with valid and reliable measuring instruments.
