

DIGITAL LITERACY TRAINING FOR TEACHERS OF YAYASAN EDUKASI NUSANTARA

by Dyna Herlina S, Siti Machmiyah, Benni Setiawan, Budiman

ABSTRACT

The Community Service Program aims to equip skills to enable teachers to access, produce and share digital learning media and also equip the librarian's skills in order to play an active role in intellectual property socialization, as well as the effective and ethical utilization of information resources for teachers at Yayasan Edukasi Nusantara. Knowledge of digital literacy conveyed includes the introduction of digital media, understanding of digital news content, downloading practices, digital content and the practice of digital content sharing. Methods used include lectures and practices using a computer. The results achieved in this PPM activity are: The ability of teachers to absorb the material is good enough, as evidenced by the increased ability from scale 6 to scale 8. However, teachers need a long time to find, share and primarily produce digital media content. This is due to the relatively low habituation. All activities can run smoothly but knowledge sharing activities on the students can not be watched carefully by the team devotees because of the limited time owned by the teacher.
