

ENHANCEMENT OF STUDENT WORK SHEET ON THE DIVERSITY OF UMBI SOURCE OF CARBOHYDRATES FOR TEACHERS

by Sudarsono, Ratnawati, Budiwati

ABSTRACT

This PPM activity aims to 1) Increase knowledge and enriching the teacher's experience in recognizing the diversity of tubers as a source of carbohydrates; 2) Improving the ability of teachers in compiling Student activity sheet about tuber diversity as a source carbohydrate. Activities carried out 2 stages. The first stage of material enrichment about diversity of carbohydrate source tubers and scientific based learning models with real objects. The second stage of preparing Student activity sheet about tuber diversity carbohydrate source. During the activity and the results of the questionnaire participants showed this activity quite successful. The participants were quite enthusiastic about participating in this activity the number of questions related to the material that appears during the question and answer from participant. According to the participants the activity has the opportunity to make learning more interesting because it is done outside the classroom, and is easily implemented because it uses objects that is close to the student environment.
