

# **TRAINING ANALYSIS OF THE EVALUATION RESULTS AND THE QUESTION OF GRAIN SUBJECT FOR MIDDLE SCHOOL SOCIAL STUDIES TEACHERS IN KEMBUMEN**

**by Saliman, Satriyo, Raras**

## **ABSTRACT**

Assessment of learning in school, but there are showed many instances of errors of assessment. For example in the manufacture of the test questions used to gauge the success of teacher student learning. Many teachers who devised the test only desultory, not using the correct procedure. As a result of the test does not measure what is actually measured, and has no keajegan in the assessment of the learning of social studies education, this is because there is still not a few teachers who have not mastered the procedure for preparing the standarize test.

Related to the above issue, then felt the need to carry out training activities preparation of Reserved standarisation Tests to teachers of social studies in Kebumen, Central Java, because that was considered important to provide social studies education teachers compile problem to make standarize test, so that the quality of learning social studies educations is increasing.

This devotion was followed by teachers of Junior High School Social Studies district Kebumen a number of participants is 51 persons. The implementation of activities carried out on August 10, 19 and 26 October 2017, with pretty good results, because the participants were very enthusiastic and has completed all the activities and tasks that are given to good use.
