ABSTRACT

The main problem that arises is the lack of understanding, motivation and writing skills of teachers at YAPPIS Semarang Junior High School. The problem in this activity is how to increase participants' understanding to explore/search for ideas and actualize them into value education-based scientific work. Next, how to increase participants' understanding of the preparation of scientific writing based on good and correct values education. These two things are the problem. The solution to this problem is the need for training activities for PAI teachers in junior high schools to increase teachers' understanding, motivation and competence in writing scientific papers based on good and correct values education. This activity was carried out in an activity with the theme "Scientific Writing Training for Middle School PAI Teachers in Semarang Regency". The training took place on Wednesday 16 November 2022, which was carried out offline and directly invited PAI SLTP teachers throughout Semarang Regency. The event took place at Sudirman Islamic Vocational School, Yappis Foundation Semarang. The speakers in this activity were the MKU PAI UNY lecturer team. The output of this activity is in the form of training activities and workshops (writing practice), Implementation Agreement and additional output in the form of mass media publications

Kata Kunci: *Training, Writing*
