

IMPROVEMENT OF THE ABILITY OF WRITING SCIENTIFIC WORKSHOP FOR TEACHER OF PANCASILA AND CIVIC EDUCATION IN MADRASAH ALIYAH IN THE SPECIAL REGIONS YOGYAKARTA

by Dr. Marzuki, M.Ag., Dr. Sunarso, M.Si., Dr. Samsuri, M.Ag., Fajar Susilo Putro, and Isnaini Rohmawati

ABSTRACT

The purpose of this community service (PPM) activity is to eliminate the stigma about the difficulty of writing scientific papers for the teachers of PPKn in Madrasah Aliyah in Yogyakarta, develop the ability of PPKn teachers to write scientific papers, and to make papers that can be published in scientific journals. The benefits of this PPM activities are: 1) for the participants, to know the models of writing scientific papers and skills in writing scientific papers to be published in scientific journals, and 2) for the PPM implementing team to capture the interest of writing scientific papers from each participant and make network of writers of scientific papers for scientific journals in the field of Civic Education expertise.

To solve the problems related to the writing of scientific papers faced by teachers, especially teachers of PPKn in Madrasah Aliyah in Yogyakarta need to be put forward the framework of problem solving that include: 1) self-assessment on the ability and interest of the participants, 2) substantial training and techniques of writing scientific articles to be published in related scientific journals; 3) writing of scientific articles, 4) scientific article manuscript assessment in accordance with the provisions of writing for publications in related scientific journals; 5) mentoring of scientific article manuscripts not yet in accordance with the provisions of writing for publications in related scientific journals, and 6) the submission of scientific article texts that are in accordance with the provisions of the writing for publication in scientific journals to related journals. The method used is tracking interest and experience of writing scientific papers in the form of self-evaluation, writing training of scientific papers in the form of articles of research, writing articles of research results, and mentoring writing.

The results obtained from the PPM activities are: 1) This activity is conducted in the form of workshops held in two meetings, ie, 28 August 2017 and 25 September 2017 and followed by 25 teachers of PPKn in Madrasah Aliyah of 30 invited; 2) The material of activity consists of two forms, namely the theoretical form with the materials "Improvement of Master's Ability in Scientific Writing" by Dr. Marzuki, M.Ag., "Various Sources for Writing Scientific Research-Based Articles for PPKn Teachers" by Dr. Samsuri, M.Ag. ", and " Style and Strategy of Incorporating Scientific Articles into Journals" by Dr. Sunarso, M.Si. as well as practical ones; 3) From the observation of the PPM team, it appears that the workshop participants follow the devotion activities well and quite seriously and enthusiastically, given the material given is very related to the problems they face directly, ie they are very hope to write a scientific article and can be sent to the journal at once can be published or loaded. In general, PPM activities are running well and smoothly. Starting from the planning, initial preparation, until the implementation, workshops writing scientific papers do not encounter any obstacles at all. However, when they are asked to write or practice all the theories presented in the workshop, not all of them can do well and smoothly.
