ABSTRACT

The purpose of the PPM activity is to provide appropriate technology skills (TTG) for making soap and handsanitizer based on betel leaf and aloe vera that are easy to apply in the community in the Kulon Progo area, and increase interest in entrepreneurship for people in the Kulon Progo area. The method used in the PPM activity is to provide training and assistance in making soap and handsanitizer based on betel leaf and aloe vera. PKM activities that have been carried out in Kaliagug Village, Kulon Progo have succeeded in increasing the knowledge and insight of the residents about making soap and hand sanitizer based on aloe vera and betel leaf. Another benefit that is obtained is the emergence of ideas for entrepreneurship to take advantage of free time between busyness as a housewife.

Kata Kunci: herbal soap; handsanitizer; Aloe vera; betel leaf
