ABSTRACT

In the Jatinom tourist village every year there is always a tradition of Yaa Qowiyyu in the mosque which is one of the annual agendas in the area, not infrequently Many tourists witness the tradition firsthand. However, in the mosque area in Jatinom Tourism Village, there are no adequate supporting facilities, one of which is the mosque landscape. So to increase comfort for residents in Jatinom Village, it is very necessary to have a mosque landscape planning which begins with the mosque landscape design in Jatinom Village, Jatinom District, Klaten Regency. Based on the above conditions, the devotees of the Department of Civil Engineering Education and Planning FT UNY in collaboration with the local community agreed to carry out Planning Assistance and RAB Preparation for Mosque Landscape Design in the Jatinom Village area, Klaten Regency, Central Java to increase the comfort of residents and tourists who stop by in the use of worship facilities.

The goal to be achieved in this PPM activity is to increase the understanding of the people of Jatinom Village about the landscape design of mosques in Jatinom Village, Jatinom District, Klaten Regency to increase the comfort of local people and tourists. Assist community members in the landscape design of mosques from starting to make design drawings, necessary material needs, and budget plans for installation costs in Jatinom Village, Jatinom District, Klaten Regency.

The results of this PPM are expected to provide benefits for both local communities and tourists, namely; (a) Assist in making design drawings in planning the landscape of the mosque in Jatinom Village. (b) Assist in material needs analysis in planning the construction of a mosque landscape in Jatinom Village. (c) Provide assistance in the calculation analysis of the Budget Plan (RAB) for planning the landscape of the mosque in Jatinom Village.
