ABSTRACT

The purpose of this community service activity are to (1) provide information about the benefits of cloud-based digital media in learning, (2) improve teachers' ability to use cloud-based digital media, and (3) help teachers understand how to manage learning using cloud-based digital media.

This community service activity method uses training and mentoring methods in developing skills using cloud-based digital media in learning. This community service activity was carried out at Rejodani State Elementary School (Palagan Tentara Pelajar Street Km. 11, Rejodani, Sariharjo, Ngaglik, Sariharjo, Ngaglik, Sleman) on June 21, 2021. The target of this community service activity is elementary school teachers in Ngaglik District, Sleman Regency. A total of 24 teachers from each school became the subject of this community service activity.

This community service activity can run well and smoothly. Activities like this are very much needed by teachers to improve their ability to create interactive learning media and worksheets, especially in choosing and using appropriate digital media in learning. The enthusiasm of the teachers in participating in the training and support from interested parties are important in the success of this activity.
