

Strategy to Improve Small and Medium Enterprise (SME)'s Skill in Preventing and Fighting Information Technology Fraud: Training for SME members of DEKRANAS Yogyakarta

by Diana Rahmawati, M.Si., Afrida Putritama, M.Sc.,Ak., Ratna Yudhiyati, M.Comm.

ABSTRACT

This community service program intended to improve SMEs' skill in identifying, preventing, and combating information technology fraud, specifically for SMEs which were registered as DEKRANAS' members. Thus, the target of this program can be classified furthered into 5 categories; batik and fashion, metal craft, leather craft, wood craft, dan other crafts.

This program was delivered as a mini seminar and training. In the seminar, participants obtained information about; (1) the most recent and commonly found fraud methods, and (2) relevant regulation in Law No. 19/2016. After attending the seminar, participants could discuss their issues in using IT for their business, or their plan in using IT in the future. These events were held in 28-30 Mei 2019.

Kata Kunci: *small and medium enterprise, information technology fraud*
