ABSTRACT

Sustainable Development Goals (SDGs) is a global initiative with the aim of creating a better human life in social and economic aspects and can synergize with the environment craft with Ecoprint technique that utilizes leaves and stem flowers, or other plant parts that contain color pigments is a form of utilizing the environment around the home yard. PKK Gedung Kuning women who do not have skills can utilize their spare time to increase income through community service activities in the form of ecoprint making training. The purpose of this service is to increase knowledge and skills to partners in making ecoprint 1) training to mothers about ecoprint, 2) training to mothers in making ecoprint 3) Opening Home Industry opportunities for PKK mothers as an effort to improve family welfare; 4) improve skills in making crafts that have selling value. The socialization stage was carried out by socializing ecoprint as an environmentally friendly product and introducing materials to make ecoprint. Ecoprint Fabric Making Training as an Effort to Realize Sustainable Development Goals (Sdgs) through stages: scouring (fabric washing), mordanting (fabric soaking in mordant solution and natural dye solution), preparation of leaves on the fabric, beating or pounding, and fixation (drying). The results obtained, the partners have the
