

FAMILY LEARNING ASSISTANCE TO RELIEF PROBLEMS AND MAINTAINING THE QUALITY OF EDUCATION IN THE COVID-19 PANDEMIC

by Miftahuddin, Nur Rohmah Muktiani, Satriyo Wibowo

ABSTRACT

The Covid-19 pandemic has in fact affected the fabric of human life in various aspects. With the rules of maintaining a distance so as not to contract the corona virus, the world of education must adapt to conditions. If before the pandemic learning was done face-to-face, but during the pandemic it was not possible, and distance learning is the solution. However, distance learning raises its own problems, especially the incomplete delivery of learning materials. For this reason, the purpose of PPM-KKN is to provide assistance to children from the kindergarten to high school levels in order to alleviate the difficulties they face.

The results of the PPM-KKN implementation can be conveyed, that the most basic role of students is how school children from kindergarten to high school level in the area where KKN are located get learning assistance. Study assistance by students both in the hamlets of Sanansari, Canden, and Sonopakis Kidul in the Bantul Regency area in practice has received a positive response from the community. There are several benefits obtained from this assistance, namely providing understanding to children and helping to complete school assignments, helping to understand subject matter especially in online learning, and easing the burden on parents and helping students learn to understand the learning materials they receive from school.

Kata Kunci: assistance, covid-19 pandemic, family, and learning
