ABSTRACT

Empowerment training activities aimed at women in the Krapyak Margoagung Seyegan Sleman hamlet run smoothly. The residents were very enthusiastic and had a positive attitude towards the implementation of training activities. The observations showed that all participants were actively involved in carrying out all stages of service. Citizens' interest in the material is due to their insights on sharia economics and sharia finance, so there are still many questions and confirmations about these matters. The training was even more interesting because in his presentation he used explanations and interesting concrete examples.
