**ABSTRACT**

Improving the quality of teachers is a responsibility of education unit. PPM team of History Education Department, Faculty of Social Sciences, Yogyakarta State University, take an initiative to collaborating with MGMP history teacher in Gunung Kidul to improve the skills of teachers in learning media based information technology using power point. The goal of this education program is to increase the process of learning and resulting good quality of the lessons study. The PPM team have been asked to give a training and assistance to improve skill of teacher by giving tutorial about learning media based information technology use Power Point. This training use method: 1) talking / counseling; 2) dialogist; 3) training and practice / simulation. This training programs were also carried out in order to supporting the government programs for teachers that they should familiar and know how to use media of learning technology so that the process of studying can be effective and achieve its purpose/competency.

Kata Kunci: *increased, skill, SMK teachers, learning media, power point.*
