THE EDMODO E-LEARNING TRAINING FOR HIGH SCHOOL TEACHERS IN SLEMAN DISTRICT AND YOGYAKARTA DISTRICT

by Dr. Ali Muhtadi, M.Pd

ABSTRACT

The purpose of this community service program is to: 1) increase the use of e-learning by teachers of SMA Negeri 1 Depok Sleman. 2) provide training on the use of e-learning that is easy and inexpensive.

Activities undertaken in order to achieve these objectives are supported by the following training methods: (1) presentations and questions and answers, which are intended to increase cognitive knowledge about the steps and principles in designing e-learning learning, (2) practice e-learning development using the edmodo application, (3) mentoring trainees, and (4) independent practice.

The results of community service programs implemented by the TP study program include: (1) increasing teacher knowledge and insight on e-learning development using edmodo applications in accordance with the underlying instructional design principles. This can be seen from the results of the development of e-learning produced, which has applied the principles of good instructional design. (2) Generating e-learning using edmodo applications by teachers in accordance with the expected training objectives. Based on these benefits, further activities are needed to monitor the benefits and efficacy of e-learning that have been developed into daily learning activities in the school where they teach.
