

PUSLATKAB KONI MANAGEMENT EVALUATION SLEMAN DISTRICT

by Lismadiana, Ria Lumintuaro, Agung Nugroho

ABSTRACT

This study aims to evaluate the implementation of the KONI Sleman District Puslatkab management using the CIPP (Contexts, Input, Process, Product) evaluation model.

This research is an evaluation research. The subjects of this study were the management, trainers, and athletes of Sleman Regency in total numbering 50 people. Data collected through observation, interviews, questionnaires, and documentation. Data analysis techniques used in this study are quantitative and qualitative descriptive analysis.

The results of the study showed that the evaluation of management of the Sleman Regency Puslatkan in terms of contexts had been going well. In terms of inputs related to facilities and infrastructure is still lacking. In terms of input there are trainers, athletes and parental support as expected. In terms of the process has been going well because the implementation of training and monitoring and evaluation (monitoring and evaluation) has been carried out in accordance with the provisions, and the implementation of the training program has been going well. In terms of product in general, the achievements achieved are good.
