## **ABSTRACT**

The implementation of education is accompanied by various learning tools that invite active students, one of which is through Student Worksheets (LKPD). Learning using LKPD has a function as a learning guide and as a means of mastering various competencies. Learning that is carried out by the teacher equipped with LKPD is able to guide students in mastering learning material as well as trying to activate students to be active in learning activities. Through the use of LKPD in the learning process it is hoped that it can also strengthen the character values ??contained therein. The implementation of this community service program (PPM) seeks to provide solutions to how character education is instilled through the use of LKPD in the learning process, through character-based LKPD development training in elementary schools.
