### Abstract

This PPM activity in the form of athletic play learning model training for elementary school physical education teachers in Kebumen District aims to introduce athletic teaching methods for elementary school children in a fun way so that students will eventually be interested in physical education learning in general and in particular. towards athletic learning, as well as to assist teachers in evaluating physical education learning, especially athletic sports.

The PPM implementation was carried out in collaboration between the FIK UNY service team and the K3S Principal Working Group of the Kebumen District. The form of activity in the form of a theory about athletic learning methods and athletic learning practices which were carried out all in the hall of Panjer 5 Elementary School, Kebumen District and the PGSD field of Kebumen Regency.

The total number of participants in this training can be attended by all physical education teachers, totaling 79 primary and MI physical education teachers. The training material provided is in the form of theory and practice, namely the basics of athletic activities, sprinting, hurdling, relaying, shot put, and long jump.
