

EVALUATION OF MANAGEMENT FUNCTIONS OF FIK UNY SPORTS FACILITIES IN THE TIME OF THE COVID-19 PANDEMIC

by Ahmad Nasrulloh, Sumaryanto, Sumarjo, Sigit Nugroho

ABSTRACT

The decline in income from various sports facility services at FIK UNY cannot be tolerated. Therefore, it is very necessary to evaluate the facility management function during the covid 19 pandemic. This study aims to conduct comprehensive research on the evaluation of CIPP (Context, Input, Process and Product) in the Sports Facility Management Function at FIK UNY during the Covid 19 Pandemic. This research is an evaluation type with a descriptive-evaluative approach. This research was conducted with the CIPP evaluation model (Context, Input, Process and Product). The data sources of this research consist of steahholders, FIK leaders, and managers of sports facilities management units. Data collection was obtained from observations and interviews with data sources for the function of sports management facilities. Data analysis is divided into three flows that occur simultaneously including: data reduction, data presentation, and drawing conclusions. The results of the study were able to evaluate CIPP (Context, Input, Process and Product) related to the facility management function at FIK UNY during the covid 19 pandemic, so as to find and determine policy directions and provide recommendations in carrying out facility management functions at FIK UNY.
