ABSTRACT

Competence is a capability that is shown on learning outcomes of graduates S-2 PKK. This study aims to determine 1) opinion of stakeholders on competences of graduates S-2 PKK; and 2) opinion of stakeholders on the development of curriculum S-2 PKK. This study was a survey. Sampling was done with purposive sampling, which means samples likely participated during the study. Data were collected by questionnaire that was developed from vision, mission, learning outcomes, and development of concentration courses. Data were analyzed with quantitative descriptive by percentage and qualitative. The results revealed 1) nearly all respondents agreed with the formulation of vision, mission, and LO; 2) almost all respondents agreed with the offer of concentration courses. Some suggestions were expressed related to the addition some courses that developed from courses S-1, such as: draping and exclusive clothing for clothing specialist and patisserie for culinary specialist.
