ABSTRACT

The UNY Postgraduate School Team carries out community service activities community service at the Segajih Live In Tourism Village in 2022. Results This activity is due to the lack of English language skills of tourism village activists. So English language training activities are needed to improve skills communicate in English. This activity begins with a training needs assessment English and continued with the preparation of the Jallish Module (Javanese learns English). Training activities are guided by English language experts with language role plays English. Training includes reading and memorizing the contents of the Jallish module. this activity It is also equipped with practice of the module content. Implementation time limitations result Jallish Module practice is not optimal. So it is necessary to carry out further practice. The impact of this training is the growing self-confidence of tourism village actors in communicating using English.
