ABSTRACT

Education is a long-term investment that cannot be avoided even though the benefits will only be obtained in a few years. Training is a form of education in the short term, one of which is training in writing scientific papers. Scientific paper training at SMP 4 Depok Sleman needs to be carried out with the aim of increasing student interest in making scientific papers in the form of research results or thinking studies, making students able to determine problems from the desired topic and using appropriate writing methods in making scientific papers, and able to optimize utilization the internet in supporting the creation of scientific papers.

The problem solving that is done is training and mentoring in the form of material presentation, mentoring, and presentation of scientific papers. The material presented included training in determining the problem, determining the method used and the overall proposal development. This training also explained how to use the internet to make writing and extract library and data sources. More than that, there will also be training on the presentation of scientific papers writing reports.

In general, the implementation of PPM has been running by looking at the indications of the satisfaction and enthusiasm given to the implementation of PPM. De facto, training is still ongoing with the guidance of students making scientific papers after they have been made during the training. The activity was attended by 25 participants from beginning to end so that the atmosphere of the training class was not lonely and empty. Although not so many people actively asked questions, all the participants carefully followed the existing training activities. At the meeting, the presentation session of the second scientific paper draft was attended by 16 students with 5 draft titles submitted.
