

Training on the Preparation of Special Needs Children Learning Devices based on the 2013 Curriculum for Special School Teachers in Bantul District

by Ishartiwi, Aini Mahabbati, atien Nur Chamidah

ABSTRACT

This community service program aims to improve teacher competence in applying Curriculum 2013 on education for students with special needs. The implementation of the 2013 Curriculum brings its own problems for teachers' adjustment in managing learning. Initial observation found in the implementation of PLPG 2013 to SLB teachers is that most teachers have difficulty in implementing scientific approach model in learning ABK, especially ABK who experience intellectual barrier.

The solutions to overcome these problems are training, workshops and mentoring for SLB teachers in developing learning tools for children with special needs according to the Curriculum 2013. The target of community service activities are: a) SLB teachers are able to understand the implementation of Curriculum 2013 in the context of ABK education, B) teachers are able to develop individualized learning plans for ABK based on thematic and scientific approaches in the Curriculum 2013, and c) teachers are able to prepare learning tools (materials, worksheets, and assessment criteria) for the ABK based on the Curriculum 2013.

This program has succeeded in increasing the knowledge of SLB teachers in developing learning tools based on the Curriculum 2013 for students with special needs can be realized. Furthermore, expert and school cooperation needs to be improved to increase teacher insight and improve skills in developing the 2013 Curriculum learning tool.
