

TRAINING IN DEVELOPING TEACHING MATERIALS USING GEOGEBRA FOR ONLINE LEARNING

by Agus Maman Abadi, Karyati, Sahid, Arya Pramudika, Fachrur Rozi, Muhammad Zamar Qhandy Zakariah, Muhammad Aly Sa'id

ABSTRACT

The community service (PkM) activity aims to provide training in making teaching materials using the Geogebra and Google Classroom programs to MGMP Mathematics teachers in Kawedanan Gondang Winangun, Klaten. This training activity uses discussion, assignment, practice and product/material presentation methods. This training activity went well, smoothly and according to plan. This training has had an impact and motivation for junior high school mathematics teachers in making Geogebra teaching materials as a mathematics learning medium. Apart from that, the training participants were very enthusiastic in participating in the training, this was shown by the participants' responses and activeness during the training process. The training participants felt happy and satisfied with this activity because the material was useful to support learning activities and hoped that similar activities could be carried out again on an ongoing basis.
