

HOTS-based Learning Tool Training for Elementary School Teachers in Integrated Service Unit at Mantrijeron, Yogyakarta

by Muhammad Nur Wangid, Ali Mustadi, Amir Syamsudin

ABSTRACT

Higher Order Thinking Skills (HOTS) was a way of thinking that prioritizes critical and creative values, and it might be able to provide solutions in facing the challenges of development era. The aim of this activity was to improve elementary teachers' ability in designing HOTS-based learning devices, consist of Lesson Plans and HOTS-based assessments. This activity was based on the difficulties that faced by elementary school teachers in implementing 2013 curriculum, especially in the design, and implementation of HOTS-based learning, and the development of instruments assessments. Therefore, this activity aimed to solve these difficulties, so the teachers can be professional in educating elementary students, especially in developing children's thinking skills at a higher level.
