## **ABSTRACT**

This training aimed to improved capabilities in the guidance group services of guidance and counseling teachers. Training is useful in providing insight, experience and mentoring to guidance and counseling teachers in Sleman Regency MGBK in order to improved the teacher's guidance and counseling skills in group guidance services. This activity was carried out with lecture, question and answer, assignment, discussion and simulation methods. The target audience in this training were 30 SMP BK teachers in Sleman Regency. Training materials included the Concept of Group Guidance Based on Permendiknas No. 111 of 2014, Characteristics of Middle School students, RPL Preparation of Group Guidance, and Group Guidance Techniques. The results of the training showed that there was an increase in capacity in group guidance services for guidance and counseling for junior high school teachers in Sleman Regency. Increasing the ability of guidance and counseling teachers is known from the pre-test score of 31.7 (medium category) and post-test score of 38.7 (high category). The increase in the pre-test and post-test scores reached 7 points (14,46%). Thus it could be concluded that traing has achieved targeted results.

Kata Kunci: *improvement, group guidance, guidance and counseling teachers.*
