PELATIHAN PEMBUATAN JADWAL OTOMATIS DENGAN SOFTWARE ASC TIMETABLES UNTUK SMP SE-KABUPATEN PURWOREJO

by Ilmawan Mustaqim, S.Pd., MT.

ABSTRACT

In this training, teachers who became the coordinator of the timetable will be taught and assisted to learn how to create a timetable using software. The training consists of two parts. The first is to learn how to install and learn to use the program schedule. Second, arrange timetable according to the schedule of each school. Software to be used in this training is aScTimeTables free version. Trainees will be given the freedom to use the software that they think most easy to use / apply at each school.

The process begins with registration activities with a minimum requirement of participants were able to operate the computer well. Then at the beginning of the training teachers are given pre-test to see how far trainees master the basic concepts of computer maintenance. then the instructor provides training modules appropriate material, then practice with the computer. At the end of the training, participants were given the task to measure the success rate of training.

Of the participants with the number of 31 teachers, all of them can be trained from the beginning to the end. As a result, each participant is able to make the appropriate schedule each school. Schedules that have been made are expected to be directly applicable in each school.
