**ABSTRACT**

This community service program aims to improve the English language skills of children in Kampung Emas, Krapyak IX Hamlet, Margoagung, Seyegan, Sleman, DIY. This training is designed to provide the basics of English including listening, speaking, reading and writing skills through interactive and fun methods. This activity involves teachers and students from various scientific disciplines who have competence in the field of English language teaching. The methods used in this training include educational games, storytelling, drama, and the use of audio-visual media to create an interesting and effective learning atmosphere. The results of this training are expected to increase children's learning motivation, enrich their vocabulary, and improve communication skills in English. Apart from that, this program also aims to build awareness of the importance of learning English from an early age and encourage parents' active participation in the learning process. This training lasts for three months with regular evaluations to ensure participant progress and assess the effectiveness of the methods used.
