ABSTRACT

The community service aims at improving teachers' understanding and skills in preparing Students Learning Objectives (SLOs) as a strategy for developing lesson plans and self-assessment. The target is 100% of participants able to create SLOs. Lecture, discussions, practice of designing, and simulation are forms of the community service methods. Lecture and discussion methods are used in transferring knowledge about the teacher's understanding of the material presented. Practice of designing and simulation are used to provide direct experience to the teachers in creating SLOs. The results of the community service are 1) there is improvement of the understanding and skill of teachers in creating SLOs as a strategy for developing lesson plans and self-assessment, 2) and all of the participants are able to create SLOs according to the condition of their students and school.
