

WORKSHOP ON RESEARCH BASED ACADEMIC WRITING TO INCREASE SCIENTIFIC PUBLICATION OF ECONOMICS TEACHERS IN BANTUL REGENCY

by Ali Muhson, Yeni Nur Prilanita, Ahmad Chafid Alwi, Rinda Novitasari, Viska Atmidiyanti

ABSTRACT

Scientific culture should be a part of teacher culture in PKB (Continuing Professional Development) but Most economics teachers have problems in preparing research-based articles. This activity aims to increase the interest of economics teachers in developing scientific work from research results, increase the ability of teachers to compile research-based scientific articles, improve the ability of teachers to use the internet to support the developing of scientific works, and improve the ability of teachers to compile articles in accordance with writing guidelines and scientific journal templates. This service uses training and assistance using lecture, discussion, presentation, and article preparation methods. The results show that (1) PPM activities can be carried out well and smoothly and the participants' evaluation of PPM implementation is very good, (2) the participants benefited greatly from gaining insight about academic writing based on research, and submitting manuscript through online system, (3) motivation and enthusiasm for participating in the training is very high. (4) the willingness of teachers to develop manuscript is still lacking because the target number of articles successfully compiled by participants is only reached 20%, and (5) participants feel happy and satisfied, they hope that these activities can be carried out at the next time.
