

# **Pelatihan Program Simulasi Jaringan Komputer untuk Menunjang Pembelajaran bagi Guru-guru TKJ di SMK Se-Kabupaten Kulonprogo**

**by Deny Budi Hertanto, M.Kom.**

## ABSTRACT

In this training, teachers will be taught and assisted to learn computer network simulation program, then adapted it into their teaching. While trainees are teachers of SMK located in Kulon Progo Regency DIY.

The process begins with registration activities with a minimum requirement of participants were able to operate the computer well. Then at the beginning of the training teachers are given pre-test to see how far trainees master the basic concepts of Computer Networks. Based on the results of the pretest, instructors provide appropriate training modules, then practice simulation program. At the end of the training, participants were given the task to measure the success rate of training.

Of participants with 17 teachers, all of them can be trained from the beginning to the end.
